

REACT

Your **24/7** instant site
notification system

RAMTECH.CO.UK

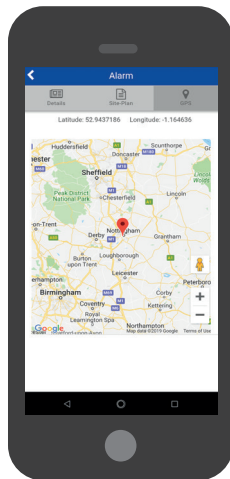

Protect your people, property and assets with REACT

REACT is a cloud-based platform that delivers 24/7 monitoring of your site, providing accurate and real-time information on incidents, and customised alerts to those individuals who need to know.

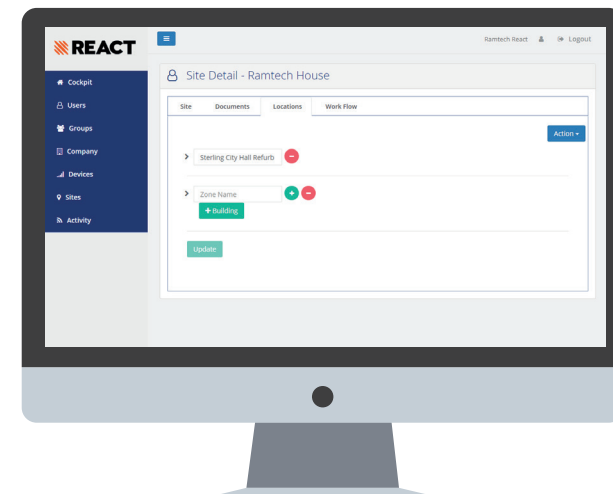

Advanced TOOL for site managers, health and safety managers, and project managers, developed to protect their personnel, assets, equipment and properties.

FEATURES:

- Notifications and customised Alerts delivered in real-time to key personnel
- Detailed incident logs and reports via dashboard, including photographs
- GPS tracking and advanced Lone Worker features
- Able to interface to existing anti-intrusion, fire alarms and other systems present on sites (water, gas detectors, hazard warnings, etc)

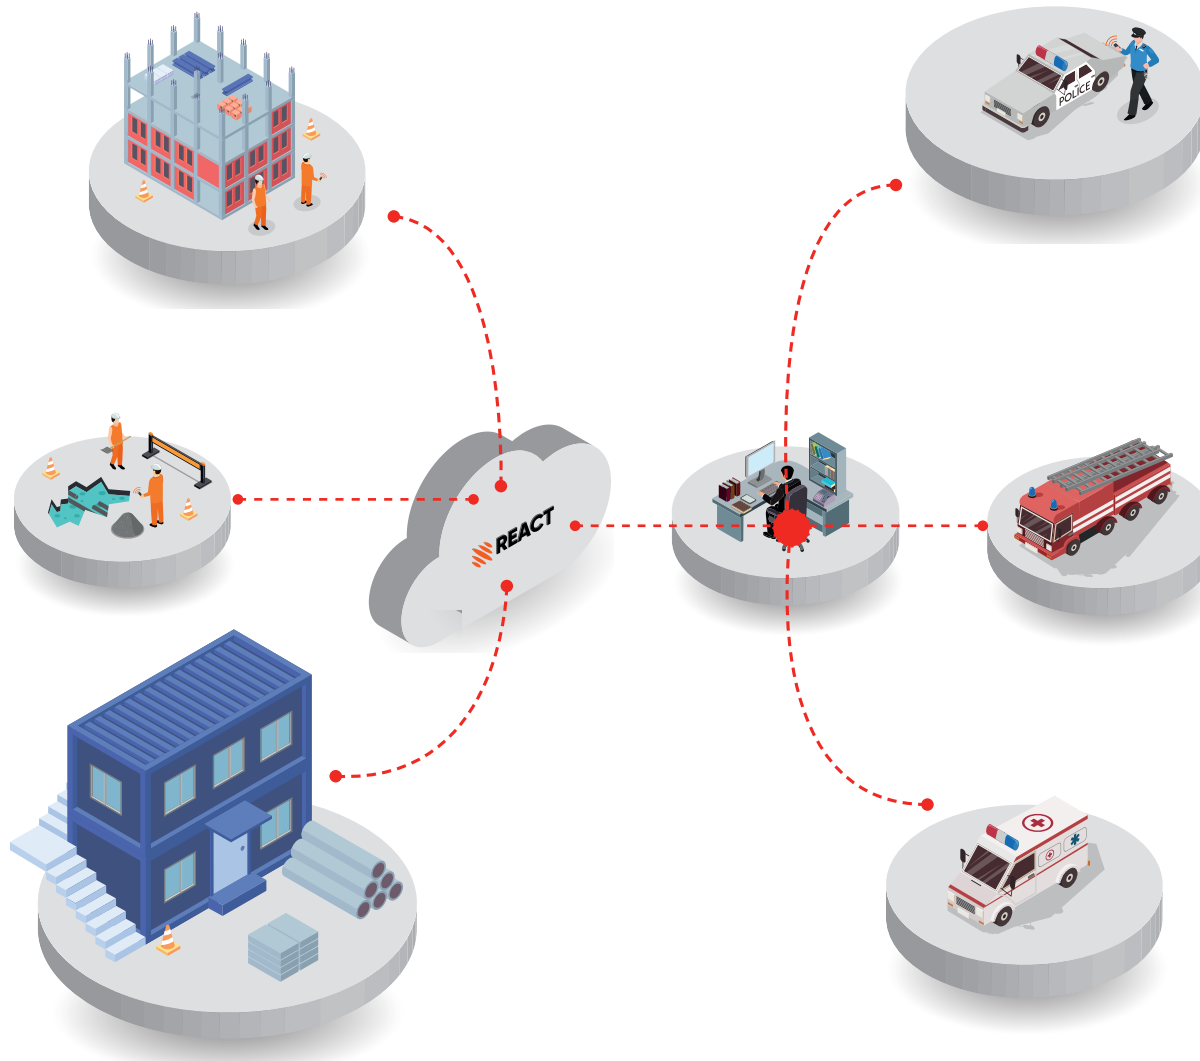

REACT app for smartphones and tablets

REACT browser-based management

The REACT system

REACT's key benefits

- **Instant notifications & customised receivers**
Instant site-wide alerts and emergency two-way communication.
- **Improves efficiency**
Real-time site management decision.
- **Proves Liability**
It gives full traceability of logs, events and responses for compliance, reports and incident investigations.
- **Multilingual platform**
It eliminates language barriers on site.
- **24/7 Monitoring**
Peace of mind outside of working hours.
- **Supports insurers & authorities**
Collaborates with authorities and insurance companies.
- **Connectivity with other systems**
- **GDPR compliant**
- **Visibility of multiple sites**

1

Alert is raised from site via the REACT app

2

Notification sent via the cloud to specified receivers

3

Receivers then respond as necessary, calling in emergency services if required
