

Jo**Bird**®

ToughStore®
Fire safety and lifesaving
equipment cabinets

The ToughStore® Range from JoBird®

Winner of the Queen's Award for Enterprise in International Trade, JoBird® is widely recognised as one of the world's leading suppliers of high performance storage solutions for fire, safety and lifesaving equipment.

This design expertise and applications experience has been used to develop storage solutions for any industrial or commercial environment, utilising a unique combination of design, performance and aesthetics.

The ToughStore® range uses innovative and technically superior materials to best suit each application.

The range includes cabinets for the storage of:

- Fire Extinguishers
- Fire Hoses
- Lifebuoys
- Lifejackets/Immersion Suits
- Breathing Apparatus Sets

Lifesaving Equipment Storage

Lifebuoy Housings

Emergency lifesaving at sea or on land at any waterside environment requires immediate access to lifesaving equipment which is both fully serviceable and easily accessible.

SOS601
Safety Station

SOS601T
Safety Station
Tall version of
SOS601

Aesthetically-designed combined lifebuoy housing and fire extinguisher cabinet, for port and marina use. Suitable storage for 1 x 6/9 kg fire extinguisher (and/or first aid kit), 22-30" Lifebuoy and 20 or 30m throwing line, with clear polycarbonate door for easy visibility. GRP pole.

Optional extras: 6/9 kg ABC fire extinguisher, lifebuoy with snatch grips, 20m or 30m throwing line, first aid kit.

SOS400 Mk2 30" Lifebuoy Housing
SOS700 Mk2 22-24" Lifebuoy Housing
(pictured previous page, far left)

These aesthetically-styled lifebuoy housings are not only adaptable to a number of different applications, with a variety of mounting and display options, but are designed to complement any waterside environment.

Special features include:

- Fully enclosed design with double doors for excellent weather protection
- Anti-tamper seal to deter vandalism
- In-mould graphics for long term durability

Optional extras: poles (with or without feet), rail-mounting brackets, lifebuoy, signage and GRP pole clamps.

SOS4 30"
Lifebuoy Housing

A reliable housing with optional cover. It can be wall, rail or post mounted.

Please see
SOS7 for pole
mounting
options.

SOS7 22-24"
Lifebuoy Housing

Suitable for any waterside use

Optional extras: cover, pole (with or without baseplate), stainless steel mounting rail brackets, lifebuoy.

Lifejacket Chests

Our lifejacket storage comes with the usual JoBird® quality guarantees. Suitable for use in any environment, they are of robust construction in moulded UV-stabilised polyethylene.

Depending on type, they fit up to 8 x 2010 regulation solid life jackets or items of similar bulk and weight. Cabinets can stack up to 8 high for transport or when not in use.

SOS510 Lifejacket/Immersion Suit Chest

For storage of up to 14 x 2010 regulation solid life jackets depending on type. TUV type tested to water ingress rating IPX5.

SOS510

SOS506 Lifejacket/Immersion Suit Chest

Storage of lifejackets or immersion suits. Holds 10 x 2010 regulation solid life jackets. Rotationally moulded polyethylene, with marine spec bungy cord for fast access. TUV type tested to water ingress rating IPX5.

SOS506

SOS516 Lifejacket/Immersion Suit Chest

Storage of up to 26 x lifejackets or immersion suits (depending on type). Rotationally moulded polyethylene, Marine spec bungy cord for fast access, stainless steel hinges, TUV type tested to water ingress rating IPX5.

SOS516

Escape Set and Breathing Apparatus Cabinets

The ToughStore® product range includes storage for breathing apparatus and an escape set cabinet (EEBD) for shipboard emergencies. These cabinets provide safe and visible storage of emergency breathing apparatus.

EEBDs are now mandatory on all sea-going vessels.

SOS100 Escape Set (EEBD) Cabinet

For storage of one 15-minute emergency escape set breathing apparatus, with anti-tamper seal facility and optional alarm. Ingress protection rating IP54.

SOS100

SOS923

SOS923 Self Contained Breathing Apparatus Cabinet

Designed to hold 1 x 30-60 minute self contained breathing apparatus. Break glass key box, polycarbonate door windows and a plastic coated sprung steel BA clip.

Fire Extinguisher and Hydrant Equipment Storage

Emergency lifesaving at sea or on land at any waterside environment requires immediate access to lifesaving equipment which is both serviceable and easily accessible.

SOS101

SOS101 Single Fire Extinguisher Cabinet

Designed to hold 1 x 9kg/9l extinguisher.

With its clear doors and robust construction, the SOS101 is especially effective against accidental or deliberate misuse in public buildings, such as schools, offices, hospitals or leisure facilities.

Special features include:

- Left or right hinged door
- Clear door for easy inspection
- Aesthetic design
- Strong polycarbonate and ABS construction
- Quick-release catch
- Optional alarm or security seal
- Indoor or outdoor use
- Reduced maintenance

SOS506 Fire Hose Equipment Chest

For storage of 2 x 20 litre foam containers, a foam branch pipe and two layflat hoses. Rotationally moulded polyethylene, marine spec bungy cord for fast access and optional IMO label.

SOS12

SOS12 Single Fire Hose Cabinet (for ships)

Designed to hold 1 x 18-20m fire hose and nozzle.

Special features include:

- UV stabilised rotationally moulded polyethylene
- Optional IMO label (as shown)
- O section EPDM seal

Applications

The range of applications extends from heavy duty industrial use to commercial environments including:

- Waterfront locations
- Marinas
- Commercial shipping
- Schools and hospitals
- Industrial and factory locations
- Offices and shopping malls
- Public buildings
- Airports, rail and bus stations

“The ToughStore SOS4 & SOS7 lifebuoy housings have been a great success both for our customers and for our company.”

James Heaton – Managing Director
Aspli Safety Ltd

Features and Benefits

All products in the ToughStore® range share a number of features and benefits including:

- Strength
- Durability
- Resistance to environmental degradation
- Versatility
- Competitive pricing

In addition, the ABS and polycarbonate combinations feature the following benefits:

- Anti-tamper seal facility
- Transparent doors for ease of contents identification
- Aesthetic appearance, ideal for use in public places
- Reverse mounting affording left or right handed door opening
